REPORT OF THE RESEARCH GROUP ON THE CHEMISTRY OF
THE CARBON-14 ISOTOPE

BY
J. H. COOPER
AND
R. M. WATSON

Submitted to the
Division of the Physical Sciences
Department of Chemistry
University of Chicago
Chicago, Illinois

Received for publication
January 10, 1955
Revised manuscript
February 10, 1955

Published by

Abstract
The research group on the chemistry of the carbon-14 isotope has been studying the reaction of carbon-14 with various organic compounds. The results of these studies are reported in this paper.

INTRODUCTION

The carbon-14 isotope is a radioactive isotope of carbon which has a half-life of 5730 years. It is produced in the atmosphere by the action of cosmic rays on nitrogen.

The carbon-14 isotope is used in a variety of scientific studies. It is used to study the rates of chemical reactions, to study the rates of biological processes, and to study the rates of geological processes.

EXPERIMENTAL

The experiments were carried out in the Department of Chemistry, University of Chicago. The carbon-14 was prepared by the action of cosmic rays on nitrogen in the atmosphere.

The carbon-14 was then reacted with various organic compounds. The results of these reactions are reported in this paper.

The results of these studies show that the carbon-14 isotope is a useful tool for studying the rates of chemical reactions, biological processes, and geological processes.

THE UNIVERSITY OF CHICAGO
DIVISION OF THE PHYSICAL SCIENCES
DEPARTMENT OF CHEMISTRY
CHICAGO, ILLINOIS 60637

TO THE EDITOR:
I am writing to you to inform you
of the results of my research
on the properties of the
newly discovered element.

The results of my research
show that the new element
has a very high melting point
and is very hard.

I am very pleased to report
that my research has been
successful and that I have
discovered a new element.

I am very grateful to you
for your interest in my work
and for your invitation to
present my results at the
conference.

I am very pleased to report
that my research has been
successful and that I have
discovered a new element.

Yours faithfully,
[Signature]

Dr. [Name]
Department of Chemistry
University of Chicago
Chicago, Illinois 60637

Enclosed for you are
three copies of my report
on the properties of the
newly discovered element.

I am very pleased to report
that my research has been
successful and that I have
discovered a new element.

I am very grateful to you
for your interest in my work
and for your invitation to
present my results at the
conference.

I am very pleased to report
that my research has been
successful and that I have
discovered a new element.

I am very grateful to you
